

8

WAYS TSHEETS STANDS ABOVE THE OTHERS

1

SIMPLIFY PAYROLL & INVOICING

Solve the biggest payroll challenge. Track time for hourly employees, eliminate manual time entry and avoid costly payroll errors.

2

MOBILE WORKFORCE

From the office or from the field, employees can track time on desktop, laptop, any internet-enabled device or mobile phone - even by iPhone or Android app, text message or dial-in.

3

GPS TRACKING

When employees are clocked in, GPS information is recorded by their Android/iPhone device and sent to TSheets. Employee accountability has never been easier and tracked time has never been more accurate.

4

ONLINE & OFFLINE TRACKING

Our mobile app allows employees to track time even without cell phone service. Timesheet data is stored offline and once connected, it's synced back to the office.

5

MORE THAN A STOPWATCH

To run payroll and job costing reports, you need more than a stopwatch to keep track of your employees' time. TSheets records start and stop times, keeping accurate time even when the application is closed; many time trackers do not.

6

QUICKBOOKS INTEGRATION

Quickly and seamlessly sync customers, jobs, service items and employees from QuickBooks to TSheets. And in just one click, sync timesheet data from TSheets to QuickBooks. Works with QuickBooks Online and Desktop versions.

7

PREMIUM CUSTOMER SUPPORT

We love hand-holding and promise to deliver all the customer support you or you clients need, and then some. High-tech expertise with friendly real-world insight through an actual person - with record response times.

8

INSANELY EASY TO USE

We've made it simple to track time - using any device, anytime and anywhere. We have found that making time tracking fun and easy is key to getting employees to actually use it!
